

PREMCHAND TARANGE

Software QA / Test Automation Engineer | Python | Java | Selenium | Playwright | CI/CD

Bengaluru, India | +91 86057 06005 | premtarange09@gmail.com | linkedin.com/in/prem2003 | github.com/Zeroprem

PROFESSIONAL SUMMARY

Software QA and Automation Engineer with 1 year of experience at Cisco validating enterprise software on Windows Server across distributed multi-VM environments. Strong in Python and Java automation, Selenium, Playwright, CI/CD qualification, Git workflows, test framework development, REST/API testing, and evidence-driven root-cause analysis. Built reusable validation tooling and AI-assisted failure-analysis workflows that improve release reliability, debugging speed, and actionable test feedback.

TECHNICAL SKILLS

Programming: Python, Java, PowerShell, SQL

QA & Test Automation: Pytest, Selenium WebDriver, Playwright, Postman, REST API testing, UI/API/E2E testing, test framework development, test strategy, smoke, integration, regression, end-to-end validation

CI/CD & Source Control: Jenkins, Git/GitHub, Maven, Artifactory, CI/CD pipelines, automated build qualification

Systems & Infrastructure: VMware/vSphere, Windows Server, Linux, Docker, Kubernetes, Ansible, distributed multi-VM environments

AI & Diagnostics: AI coding assistants, AI-assisted test/failure analysis, log analysis, root-cause analysis, structured logging, XML/JSON reporting

PROFESSIONAL EXPERIENCE

Cisco Systems | Software Engineer - CI/CD & Automation | Aug 2025 - Aug 2026 | Bengaluru, India

UCCE Platform Engineering / Test Automation

- Owned automated qualification for Cisco UCCE installer releases on Windows Server across distributed multi-VM environments, covering installation, configuration, reboot, patch, upgrade, regression, uninstall, and end-to-end functional validation.
- Developed reusable Python, PowerShell, Java, and Selenium automation with assertions, environment-readiness checks, setup/teardown, recovery handling, structured logging, and result reporting for repeatable software verification.
- Automated 25+ Cisco workflows and API validation for 50+ endpoints using Python, Pytest, REST APIs, and Postman; maintained broad automated regression coverage and Jenkins-based targeted execution to shorten validation turnaround.
- Built Jenkins-based smoke, integration, regression, and end-to-end validation pipelines with Git/GitHub, Maven, Artifactory, and VMware/vSphere, providing automated quality gates and actionable release feedback.
- Analyzed failed runs across application logic, automation code, services, API/CLI interactions, build agents, networking, credentials, artifacts, and virtual infrastructure; used logs and runtime evidence to isolate root causes and drive fixes with developers.
- Refactored shared automation libraries and strengthened retry, teardown, timestamp, vSphere/SSL, and failure-recovery logic, contributing to approximately 15% lower validation time and fewer avoidable false failures.
- Collaborated with development, QA, and infrastructure engineers on test strategy, code reviews, defect investigation, environment issues, release readiness, and repeatable troubleshooting.

RELEVANT PROJECT

AI-Powered Test & CI/CD Failure Analyzer | Python | Jenkins | AI-Assisted Engineering

- Built a Jenkins-integrated workflow that extracts high-signal execution evidence from failed validation runs and classifies probable application, automation, pipeline, and infrastructure causes.
- Used AI coding assistants during Python automation development for code generation/refactoring, debugging, and correctness review; generated evidence-backed root-cause summaries with failed-stage context and Webex notifications.

EDUCATION, TRAINING & CERTIFICATIONS

Bachelor of Engineering in Computer Science | SKN Sinhgad Institute of Technology and Science, Lonavala | 2020-2024 | CGPA: 7.58/10

Java Full Stack Junior Development - Corporate Training | Vinsys IT Services | Sep 2024 - Jan 2025 | Java, backend development, databases, web technologies

Certifications: Cisco DevNet Automation Certification | Cisco AI Technical Practitioner
